# How to build your Kaleidocycle:

1. Print the Kaleidocycle template of your choice onto card stock.

2. Trim the template on the boundary lines with scissors.

3. Fold UPWARD along the dashed lines in the sketch above.

4. Fold DOWNWARD on all other lines.

5. Start gluing the first tetrahedron from the bottom of the sketch above.
   The (gluing) faces marked with a "g" go inside

6. Continue with the other tetrahedra BUT leave the last one open to form a ring.

7. Close the ring.
